	Primary Examiner, Art U	Init 2431	

Continuation of 11. does NOT place the application in condition for allowance because: While the examiner appreciates the applicant's interpretation of Rump, the examiner disagrees that in the combination of Saito and Rump the sample data would be encrypted. First, Rump does not teach that the sample data should be encrypted. Second, Rump teaches in col. 6 Lines 27-52, that for economic reasons, portions of the data are left unciphered. Col. 7 Lines 50-68 further show that the multimedia data can be unencrypted. Col. 10 Lines 51-64 further illustrate that the deciphering device should be able to read unciphered content. As such, for economic reasons, one of ordinary skill in the art have been motivated to leave the sample data unciphered, rather than encrypting and decrypting the sample data which would be freely available. As such, the examiner does not find the argument persuasive.
